Putting the pieces together for you

Wireless solutions for the financial community

Traderforce Mobile provides financial market professionals with predefined or customized real-time streaming market data services to an array of mobile devices.

DESIGNED FOR MARKETS PROFESSIONALS ON THE MOVE

Traderforce Mobile was designed for demanding financial market professionals who need to monitor market movements from anywhere at anytime, using their wireless devices.

- Investment Portfolio Managers and Advisors
- Foreign Exchange & Money Market Traders
- Equity Traders
- Derivatives Traders
- Proprietary Traders within Financial Institutions
- Hedge Fund Managers
- Corporate Treasurers & Management Executives
- Financial Institution Sales Professionals.

FEATURES

- **Market overviews:** display predefined market summaries by Traderforce, including FX spots by regional areas, world indices, top gainers, losers and movers on major markets, international benchmarks, etc.
- **Personal watch lists:** easily create your personal instruments lists on the device or via your Traderforce Companion web site and track the value and performance of your portfolios in real-time.
- **Real-time quotes:** retrieve real-time or delayed full quotes from any exchange and over-the-counter market.
- **Financial news:** view the latest news headlines and stories from major press agencies in English, other European languages and Chinese.
- **Charting:** display intraday or historical chart data at 5 minute, daily, weekly or monthly time periods to give you a historical view of any instrument.
- **Alerting system:** receive automated alerts by e-mail and SMS, even while the application is not currently running. Users can be notified in real-time about any pre-determined market parameters they choose: changes in any prices, movements in specified market sectors, breaking news, risk limits being breached, automated buy/sell signals from algorithmic trading systems, etc.
